

**REMARKS**

The specification has been amended to include a Cross-Reference to Related Applications section, and to conform the title of the present application to the title of the parent application. No new matter has been added, and entry of the amendments to the specification is respectfully solicited.

Previously allowed claims 1-3, 10-14, 17-24, 32, 34 and 45 have been canceled. Applicant notes that claim 43 was omitted from the application as originally filed and respectfully requests that claim 43 be treated as canceled for purposes of prosecution of the present application. Claim 36 has been amended to place it in proper form for a method claim by correcting an obvious clerical error. No change in the scope of claim 36 is believed to result from the amendment. New claims 46-54 have been added to round out the scope of claim coverage. Accordingly claims 4-9, 15-16, 25-31, 33, 35-42, 44 and 46-54 are now pending in the application. These pending claims are believed to be patentably distinguishable over the prior art.

In view of the above, each of the presently pending claims in this application is believed to be in immediate condition for allowance. Accordingly, the Examiner is respectfully requested to pass this application to issue.

Dated: 17 OCT 2003

Respectfully submitted,

By
